

GATOR DOC PERIODICAL

UF Internal Medicine Newsletter

Get to know your April Intern and Resident of the Month!

Vishal Patel, PGY-1

- Where are you from? "Lake Worth, FL"
- As a child, what did you want to be when you "grew up"? "Cruise ship captain. Perhaps this dream is not over as most cruise ships have 1 doctor and 2 nurses onboard."
- What is something most people don't know about you? "My favorite hobby is snorkeling! Although, I will say...not the strongest swimmer."
- What is your life motto? "Twenty years from now you will be more disappointed by the things you didn't do than by the things you did" - H. Jackson Brown Jr.
- Anything else you'd like to say? "Favorite music? Reggaeton"

Steven Brady, PGY-2

- Where are you from? "Dallas, TX"
- As a child, what did you want to be when you "grew up"? A garbage man, because I thought they only worked 2 days a week
- What is your favorite food? "Mom's chicken parmigiana"
- What is something most people don't know about you? "I played lacrosse in high school"
- Who is your starter? "Charmander, because who doesn't fear a fire-breather"

Special Congratulations!

Congratulations to our very own **Eldon Matthia, PGY2** for winning the LEAD (Listens, Emphasizes, Achieves, Dedicates) Award!

Congratulations to our very own **Rosette Charles, PGY3** for winning the IDEA (Inclusion, Diversity, Equity, and Access) Award!

And a special shoutout and thank you for all of the members of the DEI committee for all of the amazing work you have done this year!

- Roddy Bernard
- Alexa Collazo
- Sama Ilyas
- Justin Lewis
- Aditi Patel
- Chintan Patel
- Haneen Saker
- Jonathon Seawright
- Tander Simberloff

QUESTION OF THE MONTH

Topic: Pulmonology

Answer at the bottom of newsletter

A 72yo man is evaluated during a follow up visit. He was seen in the ED 2 weeks prior for sudden onset chest pain. A CT scan was negative for a PE, but demonstrated an 8mm ground glass nodule in the RUL. He has had no recurrence of chest pain. Upon examination, vital signs and physical are normal. He undergoes follow up CT scans of his lungs at 12 months and at 2 years with the nodule unchanged.

Which of the following is the most appropriate management of the lung nodule

- Chest CT every 2 years for 5 years
- PET/CT scan
- Tissue sampling
- No additional testing

UF IM Residency Out and About!

Wait? Is that the light at the end of the intern year tunnel? It's blinding!

MCT saving hearts

Intern Appreciation!

PGY2s ready for picture day!

PGY3s mood

Aaaaaand now, introducing the main event of the issue!!
